	PAGE
<i>Baggaley, W. J.</i> , The determination of the initial radii of meteor trains	231
<i>Bennett, R. J. M.</i> , Hönl-London factors for doublet transitions in diatomic molecules ...	35
<i>Bopp, Bernard W., Evans, David S. and Laing, J. D.</i> Appendix by <i>Deeming, T. J.</i> , Orbital elements of six spectroscopic binary stars	355
<i>Conway, R. G. and Kronberg, P. P.</i> , Measurements of the integrated linear polarization of discrete radio sources at 610 MHz	149
<i>Crampin, Stuart and Jeffreys, Harold</i> , On the modified Lomnitz law of damping	295
<i>Deeming, T. J.</i> , Appendix of Orbital elements of six spectroscopic binary stars	355
<i>Doroshkevich, A. G., Longair, M. S. and Zeldovich, Ya. B.</i> , The evolution of radio sources at large redshifts	139
<i>Durrant, C. J.</i> , Rotation and chemical abundances in the peculiar A stars—I	75
<i>Durrant, C. J.</i> , Rotation and chemical abundances in the peculiar A stars—II	95
<i>Evans, David S., Bopp, Bernard W. and Laing, J. D.</i> Appendix by <i>Deeming, T. J.</i> , Orbital elements of six spectroscopic binary stars	355
<i>Flower, D. R.</i> , On the infra-red line spectra of planetary nebulae	245
<i>Griffin, R. F.</i> , The intensity of Sc I λ 6305 Å in late-type stars	303
<i>Harrison, E. R.</i> , Generation of magnetic fields in the radiation era	279
<i>Haslam, C. G. T., Quigley, M. J. S. and Salter, C. J.</i> , A 408 MHz survey of the galactic anticentre region	405
<i>Hummer, D. G. and Mihalas, D.</i> , Model atmospheres for the central stars of planetary nebulae	339
<i>Hutchings, J. B.</i> , Expanding atmospheres in OB supergiants—IV. A mass-loss survey ...	161
<i>Hutchings, J. B.</i> , Expanding atmospheres in OB supergiants—V. The ultra-violet resonance lines and radiative acceleration in the Orion supergiants	367
<i>Islam, Jamal N.</i> , Some general relativistic inequalities for a star in hydrostatic equilibrium—II	377
<i>Jeffreys, Harold and Crampin, Stuart</i> , On the modified Lomnitz law of damping	295
<i>Johnston, Ian D. and Wareing, Nial C.</i> , On the possibility of observing interferometrically the surface distortion of rapidly rotating stars	47
<i>Kirkpatrick, Ronald C. and Warner, Brian</i> , Theoretical energy levels in Fe IV	115
<i>Kronberg, P. P. and Conway, R. G.</i> , Measurements of the integrated linear polarization of discrete radio sources at 610 MHz	149
<i>Laing, J. D., Bopp, Bernard W. and Evans, David S.</i> Appendix by <i>Deeming, T. J.</i> , Orbital elements of six spectroscopic binary stars	355
<i>Larson, Richard B.</i> , A method for computing the evolution of star clusters	323
<i>Longair, M. S., Doroshkevich, A. G. and Zeldovich, Ya. B.</i> , The evolution of radio sources at large redshifts	139
<i>Marsh, M. C.</i> , Ionization front interaction in interstellar gas	95
<i>Mihalas, D. and Hummer, D. G.</i> , Model atmospheres for the central stars of planetary nebulae	339
<i>Monaghan, J. J.</i> , Radiation from plasma systems moving with relativistic velocities	207
<i>Moss, D. L. and Tayler, R. J.</i> , The influence of a poloidal magnetic field on convection in stellar cores	133
<i>Napier, W. McD.</i> , A method for the construction of model stellar atmospheres	287
<i>Nather, R. Edward and Warner, Brian</i> , Quasi-periodic outbursts in the white dwarf Haro-Luyton Taurus No. 76	21
<i>Peach, G.</i> , Continuous absorption coefficients for non-hydrogenic atoms, published in <i>Memoirs</i> , Volume 73 part 1	I
<i>Quigley, M. J. S., Haslam, C. G. T. and Salter, C. J.</i> , A 408 MHz survey of the galactic anticentre region	405
<i>Rawlins, D.</i> , Some simple results regarding gravitational disturbance by exterior planets—with historical applications	177
<i>Rosenberg, Ioan</i> , A high-resolution map of Cassiopeia A at 2.7 GHz	215
<i>Salter, C. J., Haslam, C. G. T. and Quigley, M. J. S.</i> , A 408 MHz survey of the galactic anticentre region	405
<i>Saslaw, William C.</i> , Gravithermodynamics—III. Phenomenological non-equilibrium theory and finite-time fluctuations	253
<i>Silk, Joseph</i> , The instability of a rotating universe	13
<i>Skilling, J.</i> , The diffusion of cosmic rays	I
<i>Somerville, W. B.</i> , A revised radio-frequency spectrum for H ₂ ⁺	201
<i>Strittmatter, P. A. and Wickramasinghe, D. T.</i> , Rotation and the DC white dwarfs	123
<i>Sudbury, A. W.</i> , A necessary and sufficient condition for the collisionless stability of a stellar system in the post-Newtonian approximation	187
<i>Tayler, R. J. and Moss, D. L.</i> , The influence of a poloidal magnetic field on convection in stellar cores	133
<i>Taylor, Gordon E.</i> , The occultation of B.D. -17° 4388 by Neptune on 1968 April 17 ...	27

SUBJECT INDEX

	PAGE
Astrophysics	
Hönl-London factors for doublet transitions in diatomic molecules, <i>R. J. M. Bennett</i>	35
Rotation and chemical abundances in the peculiar A stars—I, <i>C. J. Durrant</i>	59
Rotation and chemical abundances in the peculiar A stars—II, <i>C. J. Durrant</i>	75
Theoretical energy levels in Fe IV, <i>Brian Warner and Ronald C. Kirkpatrick</i>	115
A revised radio-frequency spectrum for H_2^+ , <i>W. B. Somerville</i>	201
Radiation from plasma systems moving with relativistic velocities, <i>J. J. Monaghan</i>	207
Gravithermodynamics—III. Phenomenological non-equilibrium theory and finite-time fluctuations, <i>William C. Saslaw</i>	253
Continuous absorption coefficients for non-hydrogenic atoms, <i>G. Peach</i> , published in <i>Memoirs</i> , Volume 73 Part 1	1
Celestial mechanics	
Some simple results regarding gravitational disturbance by exterior planets—with historical applications, <i>D. Rawlins</i>	177
Cosmic rays	
The diffusion of cosmic rays, <i>J. Skilling</i>	1
Galaxy	
The diffusion of cosmic rays, <i>J. Skilling</i>	1
A 408 MHz survey of the galactic anticentre region, <i>C. G. T. Haslam, M. J. S. Quigley and C. J. Salter</i>	405
Gas dynamics	
Ionization front interaction in interstellar gas, <i>M. C. Marsh</i>	95
Instrumentation	
On the possibility of observing interferometrically the surface distortion of rapidly rotating stars, <i>Ian D. Johnston and Nial C. Wareing</i>	47
The imaging properties of the rotation collimator, <i>A. P. Willmore</i>	387
Interstellar matter	
Ionization front interactions in interstellar gas, <i>M. C. Marsh</i>	95
Planetary nebulae	
On the infra-red line spectra of planetary nebulae, <i>D. R. Flower</i>	245
Model atmospheres for the central stars of planetary nebulae, <i>D. G. Hummer and D. Mihalas</i>	339
Radio astronomy	
The evolution of radio sources at large redshifts, <i>A. G. Doroshkevich, M. S. Longair and Ya B. Zeldovich</i>	139
Measurements of the integrated linear polarization of discrete radio sources at 610 MHz, <i>P. P. Kronberg and R. G. Conway</i>	149
A high resolution map of Cassiopeia A at 2.7 GHz, <i>Ivan Rosenberg</i>	215
A 408 MHz survey of the galactic anticentre region, <i>C. G. T. Haslam, M. J. S. Quigley and C. J. Salter</i>	405

Solar system

- Some simple results regarding gravitational disturbance by exterior planets—with historical applications, *D. Rawlins* 177
- The determination of the initial radii of meteor trains, *W. J. Baggaley*... .. 231
- On the modified Lomnitz law of damping, *Harold Jeffreys and Stuart Crampin* 295

Stars—atmospheres of

- Expanding atmospheres in OB supergiants—IV. A mass-loss survey, *J. B. Hutchings*... .. 161
- A method for the construction of model stellar atmospheres, *W. McD. Napier* 287
- Model atmospheres for the central stars of planetary nebulae, *D. G. Hummer and D. Mihalas* 339
- Expanding atmospheres in OB supergiants—V. The ultra-violet resonance lines and radiative acceleration in the Orion supergiants, *J. B. Hutchings*... .. 367

Stars—binary

- Orbital elements of six spectroscopic binary stars, *Bernard W. Bopp, David S. Evans and J. D. Laing*, Appendix by *T. J. Deeming* 335

Stars—occultations of

- The occultation of B.D. - 17° 4388 by Neptune on 1968 April 7, *Gordon E. Taylor* 27

Stars—rotating

- On the possibility of observing interferometrically the surface distortion of rapidly rotating stars, *Ian D. Johnston and Nial C. Wareing* 47
- Rotation and chemical abundances in the peculiar A stars—I, *C. J. Durrant* 59
- Rotation and chemical abundances in the peculiar A stars—II, *C. J. Durrant* 75
- Rotation and the DC white dwarfs, *D. T. Wickramasinghe and P. A. Strittmatter* 123

Stars—spectra of

- The intensity of Sc I λ 6305 Å in late-type stars, *R. F. Griffin* 303

Stars—structure and evolution of

- The influence of a poloidal magnetic field on convection in stellar cores, *D. L. Moss and R. J. Tayler* 133

Stars—white dwarfs

- Quasi-periodic outbursts in the white dwarf Haro-Luyton Taurus No. 76, *Brian Warner and R. Edward Nather* 21
- Rotation and the DC white dwarfs, *D. T. Wickramasinghe and P. A. Strittmatter* 123

Stellar kinematics

- A necessary and sufficient condition for the collisionless stability of a stellar system in the post-Newtonian approximation, *A. W. Sudbury* 187
- A method for computing the evolution of star clusters, *Richard B. Larson* 323

Universe—cosmology—relativity

- The instability of a rotating universe, *Joseph Silk* 13
- The evolution of radio sources at large redshifts, *A. G. Doroshkevich, M. S. Longair and Ya. B. Zeldovich* 139
- Gravithermodynamics—III. Phenomenological non-equilibrium theory and finite-time fluctuations, *William C. Saslaw* 253
- Generation of magnetic fields in the radiation era, *E. R. Harrison* 279
- Some general relativistic inequalities for a star in hydrostatic equilibrium—II, *Jamal N. Islam* 377
